### 1. Definitions

The following definitions apply, in addition to those in the General Business Terms and Conditions and the General Fixed Services Schedule of the MSA.

- a) **Border Gateway Protocol** (“BGP”) is an IP gateway router protocol used to exchange appropriate inter- network routing information.
- b) **Internet Standards** means the protocols and IAB Standards defined in the Internet documents RFC 1009, 1122, 1123, 1250 and 1771 and any other applicable protocols and standards as appropriate.
- c) **Local Access Circuit** refers to the connection between the Customer Premises and a Telecommunications Operator’s nearest network node / point of presence (variously called a PoP, Local Exchange and Central Office).

### 2. Service Description

Corporate Internet access is an Enterprise class high availability; uncontended/dedicated service delivered using Ethernet over fibre access. The service is scalable and delivers a symmetric service with speed options from 1Mbps to 1Gbps.

### 3. Tariff Terms and Conditions

- a) Vodafone’s Corporate Internet Service Annex, MSA and General Fixed Service Schedule shall apply.
- b) The minimum contractual period shall be three (3) months (“Minimum Subscription”). Cancellation of the Service prior to the Minimum Subscription will result in applicable charges due and payable for the remaining Minimum Subscription period.

#### 3.1 Service Optional Features

**Bandwidth variation:** If the Customer wishes to increase or decrease their Vodafone Corporate Internet bandwidth this will require formal order to Vodafone resulting in a new or varied Customer contract.

#### 3.2 Service Delivery

- a) **Internet Access Service:** Vodafone will confirm delivery of the Local Access Circuit, configure the Service and conduct a set of standard tests.

- b) Note that Vodafone provides a **Domain Name System** (“DNS”) Server for the Customer to resolve domain names to IP addresses. Two DNS IP addresses are provided during Service delivery. The Service is considered delivered even if only one of the DNS Servers notified to the Customer is operational.
- c) **Customer Premises Equipment** (“CPE”): Vodafone will install and commission CPE to provide the service to the customer, The CPE will have an Ethernet access port for access to the internet service.

### 3.3 Vodafone Service Management Boundary (“SMB”)

- a) The SMB is the physical interface port on the Vodafone CPE, which is the Customer’s access point for Vodafone’s service. Vodafone is responsible for includes provisioning, maintenance and management of all elements up to this SMB.

### 3.4 The Customer’s Responsibilities

- a) If the Customer has a connection to another ISP network, then the Customer must use BGP with a unique autonomous system number for the Customer’s network.
- b) The Customer is responsible for registering its Domain Name(s) and, unless ordering Domain Name registration service from Vodafone has been agreed, for providing primary and secondary DNS.
- c) The Customer must ensure that any existing IP addresses are registered with an approved Regulatory Authority. If the Customer provides its own IP addresses these must be at least a /29 block.
