

Vodafone launches a new green initiative to keep our planet safe

Yes, we can renew and rebuild, with bio box from Vodafone.
Not only does it help manage food waste, it also provides
high quality organic fertilizer for crops.

How can you participate in Vodafone's initiative to keep our planet safe?

The organic bin from Vodafone

1. First, ask for the help of your parents to fill an online form to order the bin from our website.

2. Put the filter into the bin and add a thin layer of Agri Qatar Composter

3. Put our leftovers up to 7 cm high. Add a layer of Coco Substrate on top of it.

4. Then add a thin layer of Agri Qatar Composter.

5. Add a thin layer of Coco Substrate and then add the leftovers.

6. Repeat steps 4 and 5 until the bin is full.

7. Strain the juice (liquid) every 3 days (or as needed).

8. To use succulents as garden fertilizer, mix it with water in a ratio of 1:10.

9. Once the basket is full, set it aside for 4-3 weeks, mix it every now and then.

Don't forget, you should always ask for the help of your parents.
